Sadman Anik

Software Engineer | Full-Stack Development

Sydney, Australia | +61 426 421 921 | sadmananik1@gmail.com
github.com/sadmananik | linkedin.com/in/sadman-anik

PROFESSIONAL SUMMARY

Software engineer with six years of professional experience building full-stack applications, APIs and CI/CD integrations using TypeScript, JavaScript, Node.js, React and Java. Contributed to open-source security scanning and civil registration software. Recent capstone experience delivering a production-deployed AI-powered content platform with real-time collaboration, automated testing and AWS deployment.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, shell scripting

Web & APIs: Node.js, React, Next.js, Express.js, Django, MeteorJS, Redux, GraphQL, REST APIs, Swagger

Data: MongoDB Atlas, Mongoose, Oracle, MySQL, PostgreSQL, Redis, Elasticsearch, InfluxDB, HL7/FHIR

DevOps & Delivery: GitHub Actions, Azure DevOps, Jenkins, Docker, AWS, Ansible, NGINX, Git, SVN

AI & Real-Time: OpenAI API, Socket.IO, TipTap, Fabric.js

Testing & Practices: Jest, React Testing Library, Cypress, unit and end-to-end testing, microservices, Agile, database migrations, Jira, Confluence

SELECTED PROJECT

GenContent Studio | Software Design & Development Capstone

CQUniversity | 2026 | Three-member Agile team

Live: gencontentstudio.com
GitHub: github.com/sadmananik/genContent-studio

- Contributed across requirements, architecture, full-stack development, testing and deployment of a production AI-powered content creation and collaboration platform in a three-member Agile team.
- Developed with Next.js, React, Node.js, Express.js, MongoDB Atlas and Mongoose, integrating the OpenAI API for AI-assisted text and image generation.
- Implemented and refined Socket.IO collaboration, including project rooms, real-time updates, user presence and Owner/Editor/Viewer role-based permissions.
- Worked on rich-text and canvas editing using TipTap and Fabric.js, reusable templates, project sharing, audit history and AI prompt/image history.
- Contributed to automated testing using Jest, React Testing Library and Cypress; the final system achieved 64 passing frontend tests and 23 passing backend tests, plus CI-integrated end-to-end testing.
- Built and maintained GitHub Actions CI/CD with automated quality and end-to-end checks, pull request review and a manual production approval gate before deployment.
- Contributed to HTTPS-enabled cloud deployment using AWS Amplify, AWS EC2, Docker, NGINX, Certbot and MongoDB Atlas.

PROFESSIONAL EXPERIENCE

Software Engineer | Dynamic Solution Innovators

October 2019 – February 2025 | Dhaka, Bangladesh

Synopsys Security Scan — Open-Source CI/CD Integrations

- Collaborated with the central integration team at Synopsys Inc. to develop and maintain security scanning integrations for GitHub Actions, Azure DevOps and Jenkins.
- Implemented plugin features supporting Synopsys security scanning products across source control and CI/CD workflows using Java, Node.js and TypeScript.
- Resolved defects, wrote unit tests, maintained documentation and supported plugin releases.

OpenCRVS — Open-Source Civil Registration

- Implemented country-specific requirements and application features in a microservices monorepo using React, Node.js, TypeScript, Redux and GraphQL.
- Refactored code, resolved defects and wrote unit and end-to-end tests.
- Wrote database migration scripts to support changes to application data; worked with MongoDB, Redis, Elasticsearch, InfluxDB, MinIO, Docker and HL7/FHIR.

InfoIMAGE — Bank Statement Delivery

- Configured bank-specific requirements and researched and implemented features for an integrated bank statement delivery solution.
- Maintained applications, resolved defects, documented changes and supported releases using MeteorJS, Node.js, Java, MongoDB, Oracle, MySQL, Ansible, Jenkins and NGINX.

Junior Software Engineer | Prolific Analytics

February 2019 – September 2019 | Dhaka, Bangladesh

- Developed service APIs and a scheduler for ProlificXM survey software using Node.js and MongoDB.
- Integrated Facebook, Twitter, YouTube and Google Analytics developer APIs to collect user data.
- Wrote Python data-cleaning scripts and worked on classifiers.
- Researched features, resolved defects and supported maintenance and releases in a stack including React, Python, Django, Docker and AWS.

EDUCATION

Master of Information Technology | CQUniversity

March 2025 – Present | Sydney, Australia

GPA: 6.636/7.0 | Coursework completed; final results pending

Bachelor of Science in Computer Science and Engineering

American International University-Bangladesh | CGPA: 3.83/4.00

May 2015 – December 2019 | Dhaka, Bangladesh
